

CellSelect

Installation Procedure

Software for selection of ENC Cells

January 2018 – First Edition

 **JHA** JAPAN HYDROGRAPHIC ASSOCIATION

Installation Procedure

1. Introduction

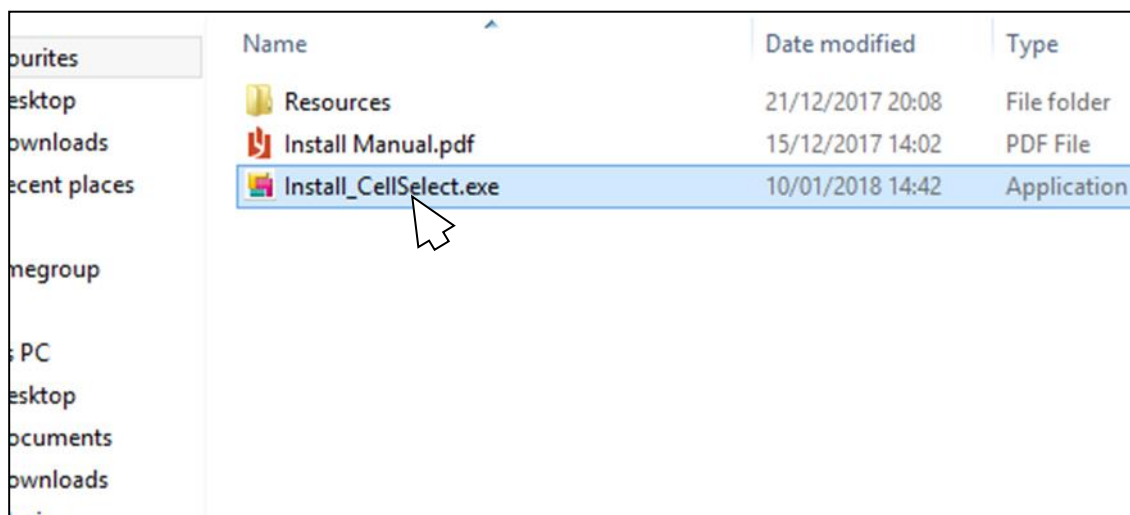

The software for selection of ENC Cells (hereinafter called as CellSelect) can only be installed by a user logged into Windows with administrator permissions.

[Operating environment]

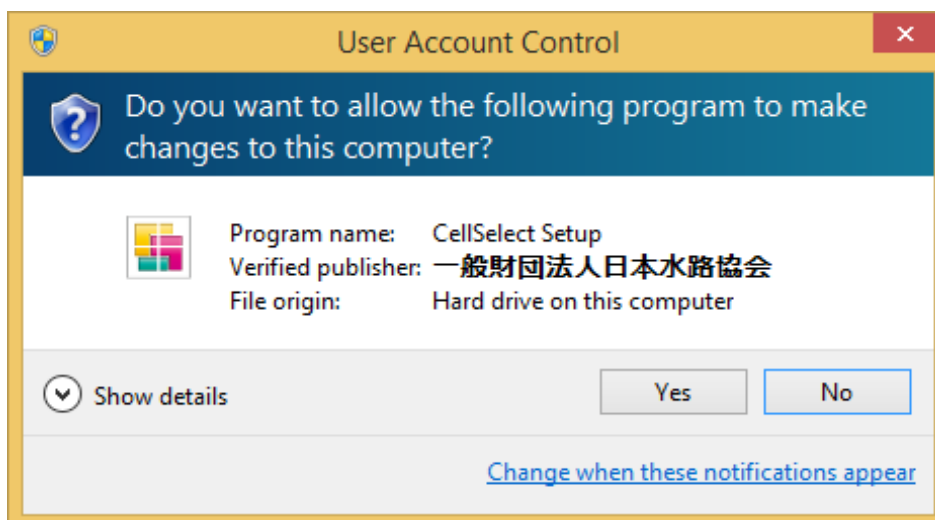

- OS: Windows 7, Windows 8.1, Windows 10
- Available hard disk space: 50MB
- This software requires NET Framework 4.6.2 or later to function.

2. Installing CellSelect

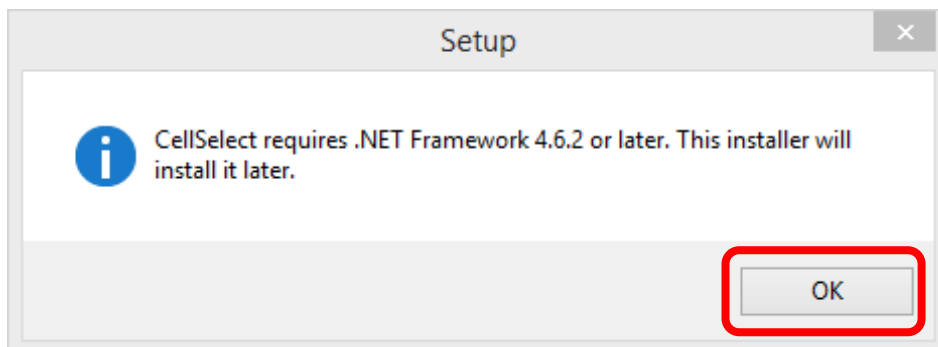

- ① Double-click the “Install_CellSelect” file or right-click it and select “Open.”

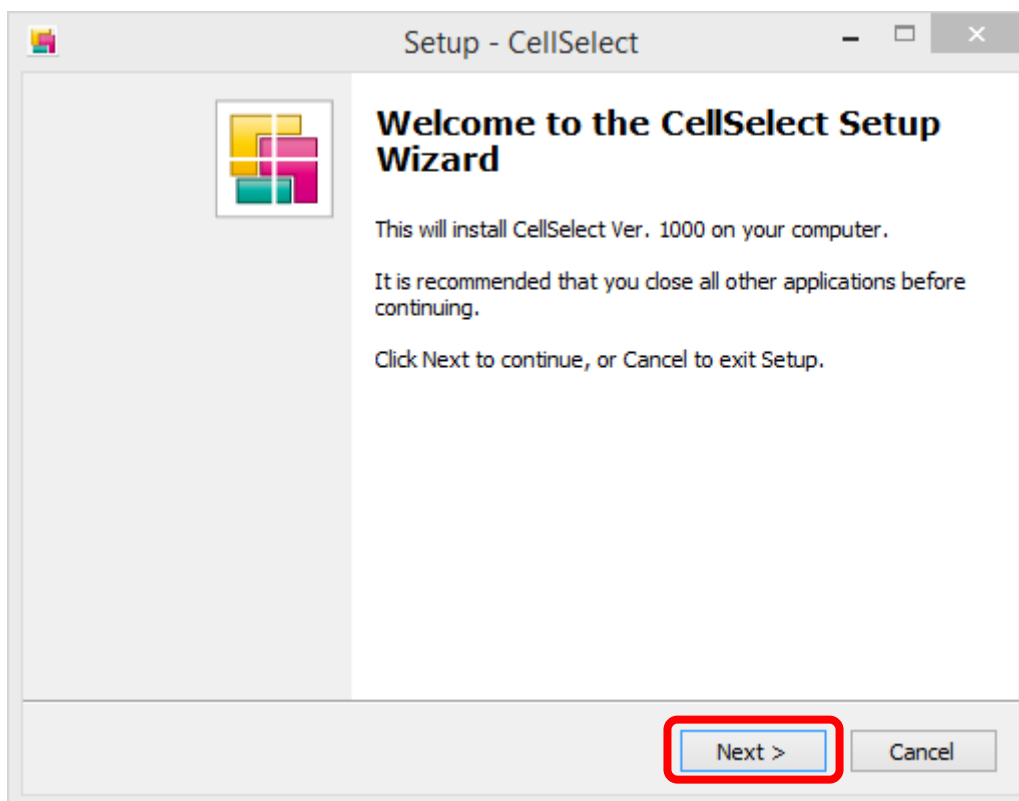

- ② The “User Account Control” screen will be displayed.
Click “Yes”.

- ③ If .NET Framework version 4.6.2 or newer is not installed, a message will be displayed. Click **OK**.

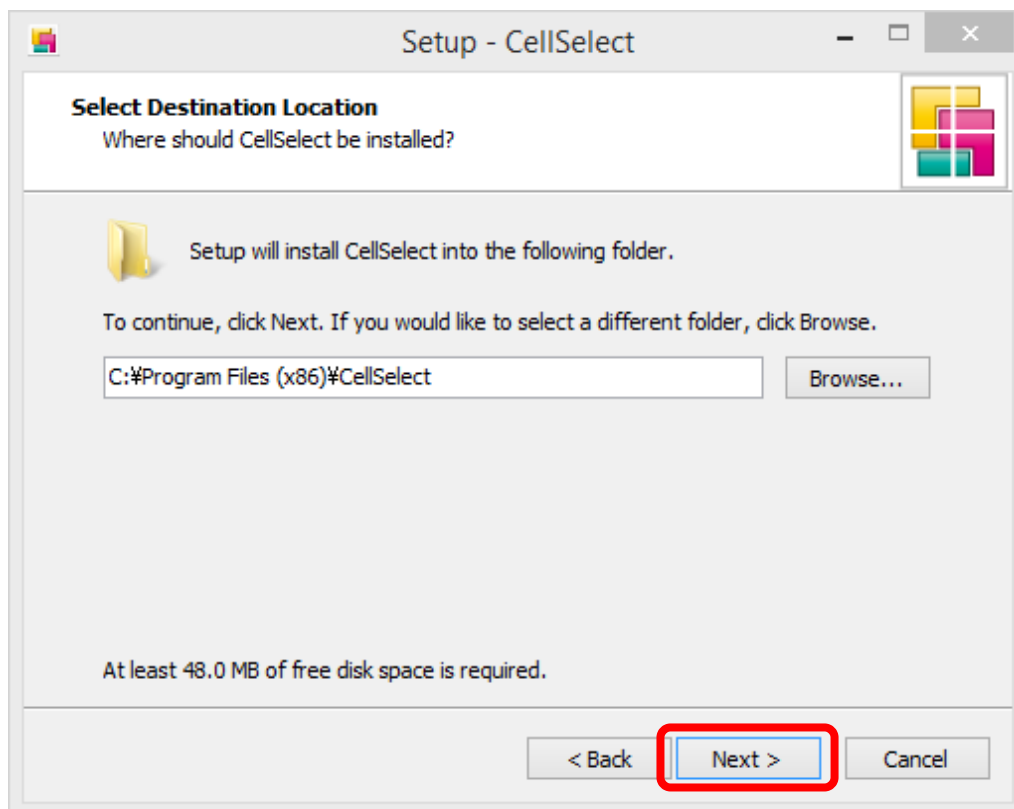

- ④ CellSelect setup start screen will be displayed.
Click **Next**.

- ⑤ The installation location selection screen will be displayed.

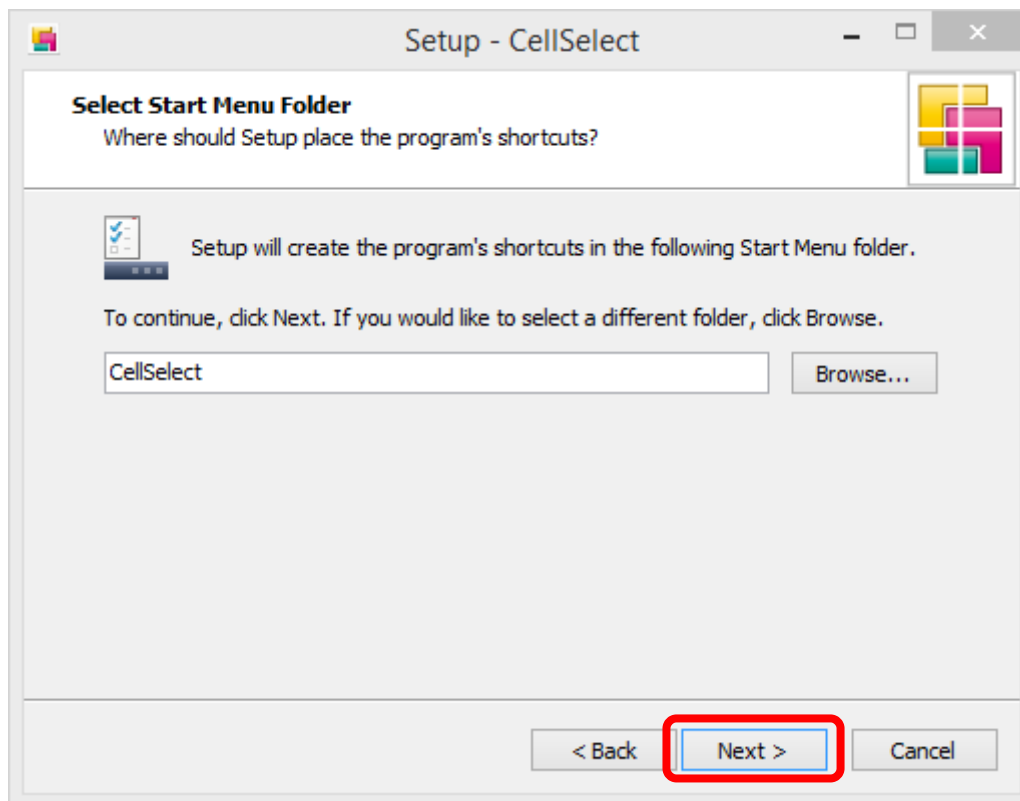

To install the program in a folder other than Program Files, click the **"Browse..."** button and select the folder in which to install the program.

Click **"Next"**.

- ⑥ The program group selection screen will be displayed.

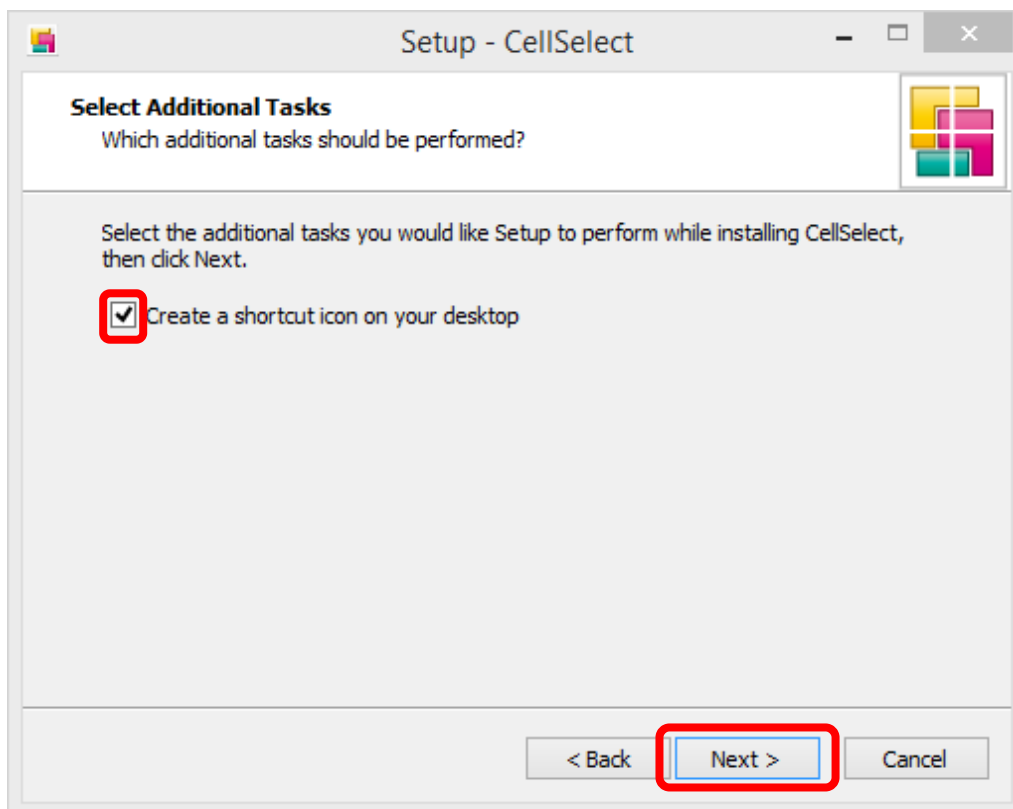

If you wish to change the program shortcut to be displayed on the Start menu to something other than "CellSelect", click the "Browse..." button and then click the "Next" button.

- ⑦ The additional task selection screen will be displayed.

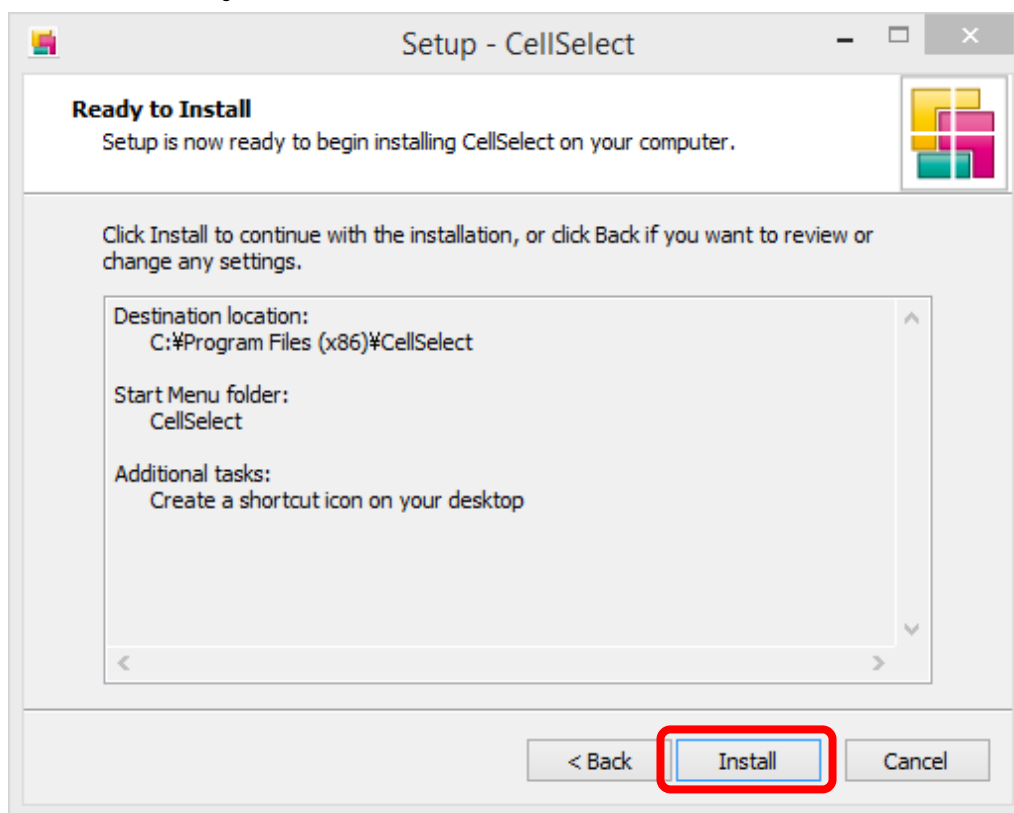

If you do not wish to create a shortcut icon on the desktop, click the "**Create a shortcut icon on your desktop**" checkbox to uncheck it.

Click "**Next**".

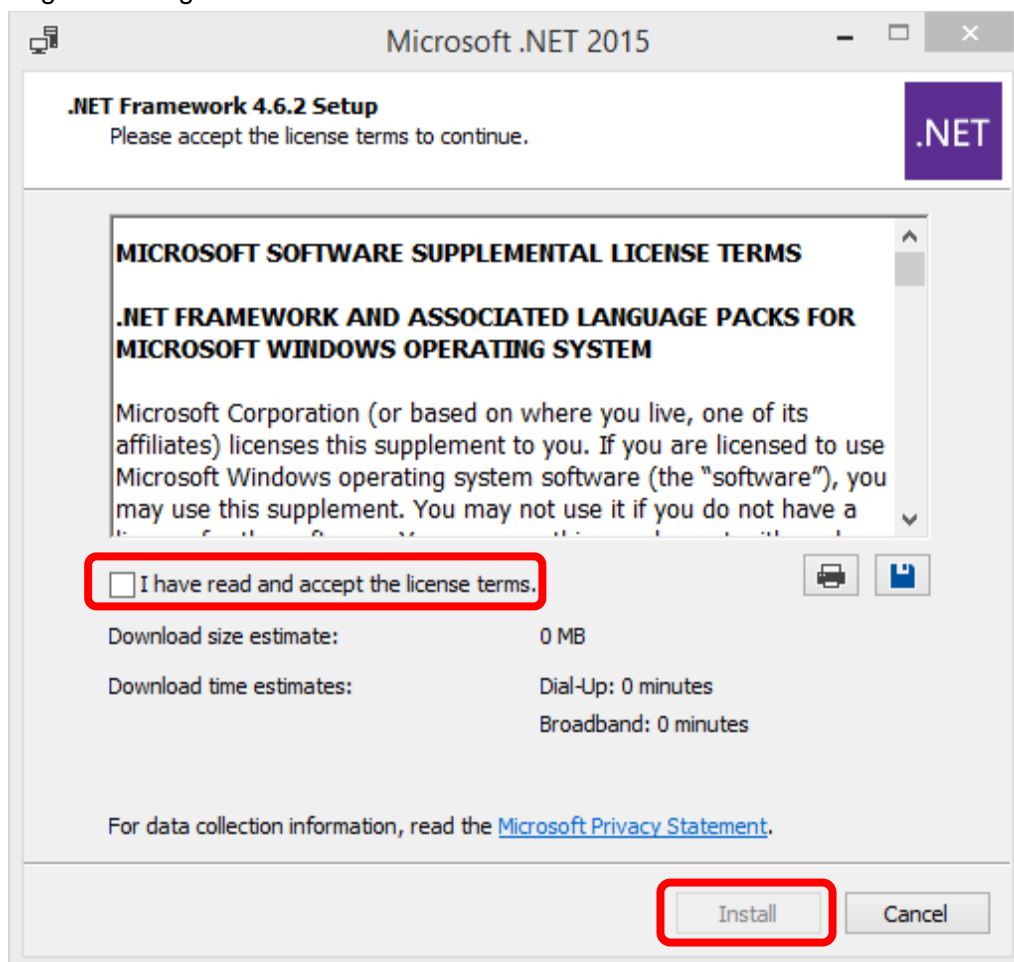

- ⑧ The installation preparation complete screen will be displayed.

Click **"Install"** to begin installation of CellSelect.

- ⑨ If .NET Framework version 4.6.2 or newer is not installed, the .NET Framework installation screen will be displayed.

Click the **"I have read and accept the license terms"** checkbox to check it and click **"Install"** to begin installing .NET Framework.

If **"Cancel"** is clicked CellSelect will be installed but it will not be possible to start the software. If this happens, double-click the Install_CellSelect file again and install .NET Framework.

- ⑩ When the installation process is complete, the installation complete screen will be displayed.
Click **"Finish"**.
