

STEP1 Select cells

1 Cell selection

Cells can be selected using any of six selection modes. Selected cells are shown in the cell list.

- a** Select from Map Cells are selected by directly clicking them on a map.
If there are multiple cells at the position that was clicked, a pop-up will appear, allowing you to indicate which cell you wish to select.
- b** Select from Sea area Cells are selected by designating an area on the map by dragging it. All cells within the area will be selected.
- c** Select from Route Cells are selected by plotting a route on the map. All cells along the route will be selected.
- d** Select from Cell list Cells are selected from a list of cells.
Cells can be narrowed down in the cell list by entering cell title or checking the usage band.
- e** Select from Ports Cells are selected from a list of ports.
Cells can be narrowed down in the cell list by entering port name or selecting area.
- f** Select from Paper charts Cells are selected from the publication range of a paper chart.
Cells can be narrowed down in the cell list by entering partial chart title or chart No.

2 Adding cells to the cart

Check the cells in the cell list and click the "Add checked cells to cart" button **g**, the checked cells will be added to the cart.

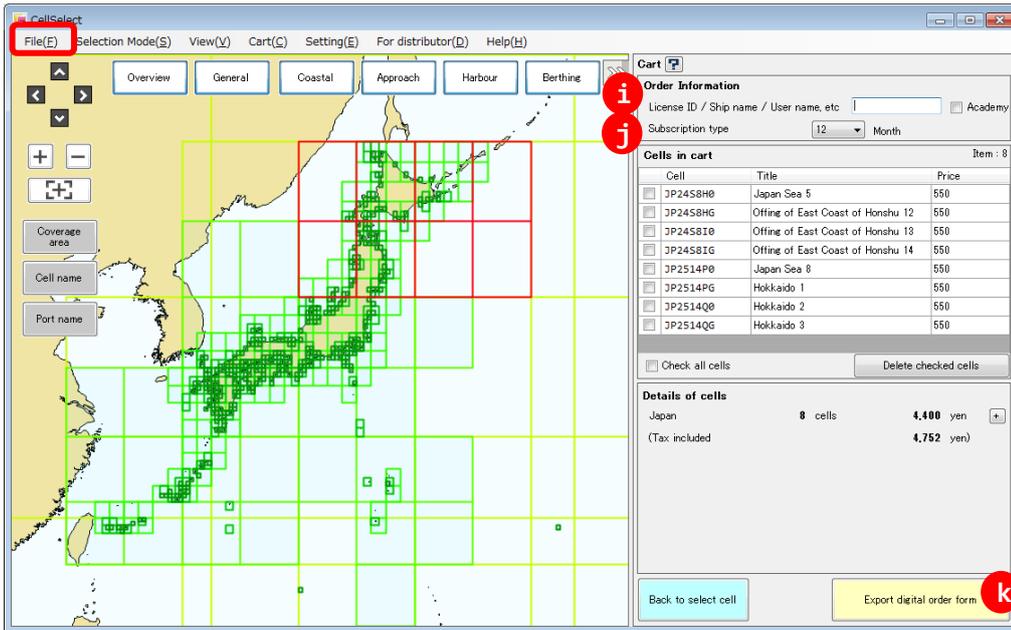

[Importing a cell list from a file]

Cells can be added to the cart by importing the cell list, cell permit file, and the file created Chart Navi, etc. from the "Import cell list" on the "File" menu.

3 Confirming the cart

Click the "View Cart" button **h**. The cart screen will be displayed.

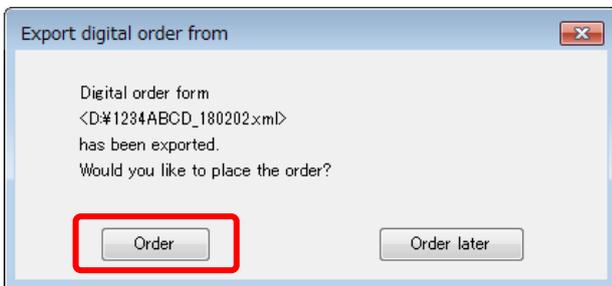

STEP2 Export order file
